### CURRENT CATALOG DESCRIPTION:

A study of the aesthetics and mechanics of lighting design. An examination of the fundamental concepts involved in formulating the lighting design for a theatrical performance. Experiences in basic electricity, the instrumentation and control equipment of lighting, use of color media and the mechanical development of lighting plots required for production.

**PROPOSED CATALOG DESCRIPTION** (no longer than 75 words): leave blank if no changes are being proposed to the catalog description. NOTE: information about prerequisites should NOT appear in the catalog description.)

### RATIONALE FOR CHANGE:

Removing the requirement of THTR 100 as a prerequisite for the course better reflects the content areas between these two courses. THTR 235 is a study of the artistic process a theatre designer engages in order to achieve a cohesive stage picture.; THTR 100 is a course that trains students in the process of technical production in a theatre context. This change will also facilitate more non-majors to take THTR 235.

Additionally, the change of formal title from “Lighting Design I” to “Lighting Design” aligns the course title with its curricular counterparts in other design disciplines and is more logical as there is no “Lighting Design II” course.
