**CURRENT CATALOG DESCRIPTION:**

This course examines the science and methods of physical anthropology as it relates to medico-legal work done to identify unknown dead found in atypical circumstances. This introductory course in forensic science introduces human osteology and dentition to identify age, sex, stature and ancestry; methods for processing remains and interpreting evidence of trauma; and techniques for estimating the time of death and post-death affects. Be advised that course materials graphically depict trauma-inflicted individuals in states of decomposition.

**PROPOSED CATALOG DESCRIPTION** (no longer than 75 words): leave blank if no changes are being proposed to the catalog description. NOTE: information about prerequisites should NOT appear in the catalog description.)

No change proposed

**RATIONALE FOR CHANGE:** We seek to add Anth 211 (Intro to Cultural Anthropology) as an additional prereq option for this course. Anth 211 is the entry-level core required course for majors; Anth 211 also serves as the primary gateway course to all of our upper level Anthropology courses for UMBC students in general. It was not included in the original application for this course due to an oversight.
