CURRENT CATALOG DESCRIPTION:

Analysis of the economic aspects of urban problems and of alternative public policy of local, state and federal government. Topics are government expenditure, location, tax theory and borrowing policy, employment, income, poverty and welfare, housing and urban renewal, environmental quality, transportation and public overhead capital, and public services.

PROPOSED CATALOG DESCRIPTION (no longer than 75 words): leave blank if no changes are being proposed to the catalog description. NOTE: information about prerequisites should NOT appear in the catalog description.)

An economic analysis of the nature and development of urban areas is presented. Topics related to urban areas such as transportation, housing, and poverty, are discussed, as are policies related to these topics. The role of urban centers as part of a larger regional area, and regional economic development patterns may also be discussed.

RATIONALE FOR CHANGE:

The course name and description changes more accurately describe of the course content.
