CURRENT CATALOG DESCRIPTION:

The course deals with the factors underlying the demand and supply of health and medical care services. Included are the market, voluntary nonprofit and governmental sectors of the industry. Special topic are the regional coordination of hospital facilities and programs, the consumer price index, and the measurement of benefits and costs of control programs.

PROPOSED CATALOG DESCRIPTION (no longer than 75 words): leave blank if no changes are being proposed to the catalog description. NOTE: information about prerequisites should NOT appear in the catalog description.)

Economic analysis is applied to the supply of (production) and demand for (consumption) of health and health care. The role of government regulation and policy in health care systems, and the way health care policy is determined are examined. Insurance and health care financing issues, and the way health care providers make production decisions are among the additional possible topics covered.

RATIONALE FOR CHANGE:

We determined that preparation in statistics would be beneficial for students entering ECON 467. The course description change more accurately describes the course content.
