CURRENT CATALOG DESCRIPTION:

A practical study of the technical aspects of costumes through departmental production crew assignments. Students will learn how costumes are constructed and will develop skills needed to assist those constructions. Students will learn the process of costume construction from design to finished costume worn on stage.

PROPOSED CATALOG DESCRIPTION (no longer than 75 words): leave blank if no changes are being proposed to the catalog description. NOTE: information about prerequisites should NOT appear in the catalog description.)

RATIONALE FOR CHANGE:

As the Department has implemented the THTR “260-series of courses” in Theatre Production, we have better determined how these courses should be completed. In this regard, THTR 263 can only be taken after successful completion of THTR 104 as the content areas build progressively in sequence to best position the student for success. This clarification allows students and advisors to more accurately plan progression of courses against the Department’s lock-step graduation plan.

We are removing the course’s repeatability to reflect actual Department practice. Should a student wish to again perform production duties in this content area, he or she would take a THTR 339 Advanced Production Techniques with the appropriate instructor. This sequence better positions students for timely graduation given the upper-level production requirements in their junior and senior semesters.
