Rationale (see instructions):

a) What are the major departures from the current structure and why is the new structure preferable?
The Animation concentration faculty in Visual Arts determined that the addition of ART305 Introduction to Cinematic Arts is an acceptable elective for Animation students because the course covers numerous foundations of live action moving image practice. These concepts can be applied to animated films. Additionally, mixing animation with live action is common in the moving image art practice, therefore adding ART305 as an elective will enable students who are interested in these hybrid practices to do so more effectively.

Animation faculty have determined that having ART495 Independent Study as an elective has led to an overload of requests from students to have faculty serve as independent study mentors. Animation faculty would instead prefer to suggest ART495 for relevant student projects though advising.

What provisions will be made to accommodate current students if courses are discontinued?
No courses will be discontinued

b) If there is a change in required credits, please provide a specific justification for that change.
There is no change in the required credits.
