

## UMBC UGC Instructions for Change in Existing Course Form (Revised 2/2015)

**Course number & title:** Enter the current course number and title of the course at the top of the page.

**Date submitted:** The date that the form will be submitted to the UGC.

**Effective date:** The semester that the change will be effective, if approved.

**Contact information:** Provide the contact information of the Chair or UPD of the department housing the course. If the course is not housed in a department or program, then provide the same information for the head of the appropriate academic unit. (See UGC Procedures.) If another faculty member should also be contacted for questions about the request and be notified about UGC actions on the request, include that person's contact information on the second line.

**Course information:** Provide all of the current information for this course. Check the "change" column for aspects of the course that will be changed by this proposal and provide the specific changes. Unchanged fields may be left blank under the "proposed" column. *Note: all 300- and 400-level courses must have prerequisites or recommended preparation.*

**Course number:** For cross-listed courses, provide all the numbers for the course.

**Transcript title:** Limited to 30 characters, including spaces. Leave the current transcript title blank if this is not known.

**Recommended Course Preparation:** *Please note that all 300 and 400 level courses should have either recommended course preparation(s) or prerequisite(s) and that 100 or 200 level courses may have them.*

Here fill in what previous course(s) a student should have taken to succeed in the course. These recommendations will NOT be enforced by the registration system. Please explain your choices in the "rationale" (discussed below).

**Prerequisite:** *Please note that all 300 and 400 level courses should have either recommended course preparation(s) or prerequisite(s)* Here fill in course(s) students need to have taken before they enroll in this course. These prerequisites will be enforced through the registration system. Please explain your choices in the "rationale" (discussed below).

**NOTE:** Please use the words "AND" and "OR", along with parentheses as appropriate, in the lists of prerequisites and recommended preparation so that the requirements specified will be interpreted unambiguously.

**NOTE:** Unless otherwise indicated, a prerequisite is assumed to be passed with a "D" or better.

**Maximum total credits:** This should be equal to the number of credits for courses that cannot be repeated for credit. For courses that may be repeated for credit, enter the maximum total number of credits a student can receive from this course. E.g., enter 6 credits for a 3 credit course that may be taken a second time for credit, but not for a third time. Please note that this does NOT refer to how many times a class may be retaken for a higher grade.

**Grading method(s):** Check all that apply.

**Current catalog description:** Provide the course description as it appears in the current undergraduate catalog or since the last UGC-approved change.

**Proposed catalog description:** If this proposal involves a change in the course description, provide the exact wording of the course description as it will appear in the next undergraduate catalog. Course descriptions should be a) no longer than 75 words, b) stated in complete sentences, and c) avoid reference to specific details that may not always pertain (e.g., dates, events, etc.). Leave blank if this proposal does not change the course description. Course descriptions should not repeat information about prerequisites (which are always listed alongside the course description).

**Rationale:** Provide a brief explanation for the need for the proposed changes.

**Cross-listed courses:** Requests to change cross-listed courses must be accompanied by letters of support via email from all involved department chairs. Proposals for the addition of a cross-listing to an existing course must include as a part of the rationale the specific reason why cross-listing is appropriate. Email from all involved department chairs is also required when cross-listing is removed and when a cross-listed course is discontinued. Please note that Special Topics cannot be cross-listed.

*Note: the UGC form is a Microsoft Word form. You should be able to enter most of the information by tabbing through the fields. The document is protected. In the rare case that you need to unprotect the document, use the password 'ugcform'. Beware that you will lose all the data entered in the form's fields if you unlock and lock the document.*

**UMBC UGC Change in Existing Course: PHIL 251: Ethical Issues in Science and Engineering**

Date Submitted: 10/15/2018

Proposed Effective Date: Fall 2019

**CURRENT CATALOG DESCRIPTION:**

The primary focus of the course will be inquiry into the ethical responsibilities of scientists, engineers, and information technologists in today’s high-tech, information-oriented society. Students will be introduced to both historical and contemporary issues involving ethical and professional responsibility through an extensive discussion and analysis of case studies. The key feature of the course will involve learning how to conduct an ethical analysis and then learning how to apply this analysis to a case study. Teams will be formed early in the semester so each group can meet and discuss case studies before they are discussed in class and before written assignments are due. Each team also will be required to engage in an extended case study project that will culminate in a team presentation of the case study in a PowerPoint format. Note: Philosophy students may not count PHIL 251 and PHIL 252 towards the major. Credit will not be given for both PHIL 251 and ENES 251.

**PROPOSED CATALOG DESCRIPTION** (no longer than 75 words): leave blank if no changes are being proposed to the catalog description. NOTE: information about prerequisites should NOT appear in the catalog description.)

This course focuses on the ethical responsibilities of engineers and information technologists. Students will analyze case studies and the content of professional codes of ethics using the tools of moral philosophy, with the goal of helping them to better understand and address morally significant problems that will arise in their careers, including: resolving tensions between competing values, taking responsibility for failure, communicating risk, and fulfilling duties to various stakeholders concerning safety and environmental impact.

**RATIONALE FOR CHANGE:**

This updates the previous course description, making it more closely fit the content of the course as it is taught now. The previous description also highlighted team projects and a powerpoint ethical analysis project as key to the course. The course is no longer taught with this focus. Further, the philosophy Department no longer wants to prevent philosophy majors from counting PHIL 251 towards the major requirements.
