PROPOSED CATALOG DESCRIPTION (Approximately 75 words in length. Please use full sentences.):

This course will provide an overview of Alzheimer’s disease and other forms of dementia using person-centered philosophy. The experience of dementia will be explored from the perspectives of the person diagnosed, family members and friends, and informal and formal caregivers. Students will gain a holistic insight into these disorders and their implications for both individuals and communities. The foundational concept of this course will be the personhood of those diagnosed and living with dementia.

RATIONALE FOR NEW COURSE:

a) Why is there a need for this course at this time?

AGNG 355: The Experience of Dementia will incorporate content pertaining to Alzheimer’s disease and related disorders, and the philosophy of person-centered care. The prevalence of Alzheimer’s disease and related disorders (i.e. other irreversible dementias) is increasing and unmitigated by a cure or prevention efforts, the incidence of the disease will continue to increase as the global population ages (Ferri et al., 2005). Nursing, psychology, and gerontology curriculums across university, community college, continuing education and non-profit educational programs have responded to these trends by offering courses on the topic.
Persons diagnosed with Alzheimer’s disease and related disorders, and those personal and professional care providers that support them, face profound and complex social, psychological, and biological challenges. Therefore, this course will address dementia and its impact from the micro to macro level of analysis. The course will include content about the pathology of Alzheimer’s disease and related disorders, the psychosocial impact of dementia for the person with dementia and their personal support system, implications for policy and programs and services, and the philosophy of person-centered care. Recent figures published by the Alzheimer’s Association estimate that 5.8 million Americans are currently living with Alzheimer’s disease and as such, in addition to their academic interests, many students will have personal experience of the impact of dementia within their families and communities. This course will also address the care and support of families impacted by dementia and resources available to support them in their journey.

b) How often is the course likely to be taught?

Once an academic year in the spring or fall semester. However, if there is a demand among the Management of Aging Services enrolled students, it may also be offered as a Summer Session course.

c) How does this course fit into your department's curriculum?

This course is consistent with the mission of the Erickson School of Aging Studies, that is, to prepare a community of leaders who will use their education to improve society by enhancing the lives of older adults and the goals of the undergraduate programs: to prepare students for entry level professional positions in management of aging services. The undergraduate major provides a strong knowledge base in human aging; understanding of regulatory/policy/fiscal issues involved in aging service provision; and fundamental management skills (i.e., accounting, human resources, critical thinking and negotiation).

This course will incorporate all the program goals within the curriculum. As this course focuses on the psycho-social impact of dementia, the topic will be explored from diverse perspectives including policies that impact the lives of individuals’ impacted by the disease and society in general, the fiscal impact of dementia for individual’s and programs such as Medicare/Medicaid and community service and support provision, and philosophies of care that impact health care delivery and long term care support and services.

This course will provide an additional, upper level content elective for students enrolled in the Management of Aging Services Major or Minor. Although only 10% of those age 65 years old and older are diagnosed with Alzheimer’s disease, age is the biggest risk factor for dementia and many students will be employed in or preparing for careers in which they will be working with individuals living with dementia directly or providing indirect services.

It is intended that this course will be available as an online or face to face course and the format will be selected dependent on the specific needs of the students at that time.

d) What primary student population will the course serve?

While this course will be primarily offered for upper level students enrolled in the Management of Aging Services Major or Minor and they will have priority, it will also be open to students in any other discipline if seats are available.
e) Why is the course offered at the level (ie. 100, 200, 300, or 400 level) chosen?

A 300 level designation for this course is appropriate with the level of content, assessments, and academic rigor required as outlined in the syllabus. This course will require learners to demonstrate upper level critical thinking skills of analysis, synthesis, and evaluation.

f) Explain the appropriateness of the recommended course preparation(s) and prerequisite(s).

While students in the Management of Aging Services Major or Minor will have completed AGNG 100 and AGNG 200 prior to taking this course and it will build upon their course of study, students not enrolled in Management of Aging Services programs could successfully complete this course without these courses. For those purposes and in order to ensure that students from other disciplines who wish to take AGNG 355 as an elective have access to this course, AGNG 100 and 200 are recommended rather required and enrollment will be assessed on an individual basis.

g) Explain the reasoning behind the P/F or regular grading method.

This course can be used as an elective for the Management of Aging Services Major and Minor and therefore will require the regular grading option.

h) Provide a justification for the repeatability of the course.

This course is not repeatable for additional credit as the course content will remain consistent.

ATTACH COURSE SYLLABUS (mandatory):

Course Outline: A syllabus is provided inclusive of main topics and a weekly assignment schedule which includes complete citations for readings with page numbers as appropriate. Examples of how the students’ knowledge and skills will be assessed are provided.

While the syllabus provided is for the 100% online version of this course, this course will also be adapted as a face to face version as appropriate. When offered in the face to face format the weekly assignments will be modified to in class, interactive, active learning activities. The course content, learning activities, and high point assignments will remain the same.
AGNG 355 – The Experience of Dementia

Instructor
Louise M. Murray, EdD.

Office Hours
In person, by phone or virtual meetings available by appointment.

Contact Information
Office: The Erickson School of Aging, 5523 Research Park Drive, Suite 230, Baltimore, MD 21228.
E-mail: Immurray@umbc.edu (Preferred method - I return messages within 24 hours, excluding breaks and weekends).
Phone: 443-543-5644.

Course Description
This course will provide an overview of Alzheimer’s disease and other forms of dementia using person-centered philosophy. The experience of dementia will be explored from the perspectives of the person diagnosed, family members and friends, and informal and formal caregivers. Students will gain a holistic insight into these disorders and their implications for both individuals and communities. The foundational concept of this course will be the personhood of those diagnosed and living with dementia.

Course objectives
Upon completion of the course the learner will be able to:
1. Demonstrate an understanding of Alzheimer’s disease and related disorders that goes beyond the pathology and medical implications of the disease and incorporates the implications for individuals, families, care providers, and society.
2. Summarize the biological, social, and psychological implications of Alzheimer’s disease and related disorders.
3. Evaluate the diversity of the disease and its impact on individuals.
4. Analyze how societal and cultural factors impact persons with dementia and their loved ones and serve to shape their experience.

Course Format:
This course is 100% online and is asynchronous.

Required Texts:
- Additional Required Readings: Posted to Blackboard
Course Expectations

Below is a list of things expected from students:

1. Regularly log into the course in Blackboard. I would recommend that you log in several times a week. Assignments for the coming week will open on Friday evening and assignments will be due by Wednesday at 11:55 pm EDT and/or Friday by 11:55 pm EDT each week. Please check carefully for due dates/times as late submissions will not be accepted.

2. There will be materials and assignments that students are expected to review and complete every single week.

3. Expect to spend at least 9 hours each week completing the modules and assignments for our class. This is equivalent to what is expected in a spring/fall semester face to face class (i.e., 3 hours in class per week + 6 hours outside of class per week = 9 hours per week total).

4. You should review ALL of the resources for a given week. These resources inform both your assignments and your exams.

5. You should take notes as you review the resources for a given week, just as you would take notes during a lecture. While the exams are open note/book they are timed. This means you will not have time to look up the answer to every single test question.

6. Complete all of the assignments each week. Make sure your assignments are submitted by 11:55 p.m. E.D.T. on the day that they are due. Please see the late work policy outlined below. No late assignments will be accepted for grading without a documented excused absence.

7. All assignments are designed to reflect comprehension and application of the assigned learning activities. All responses should demonstrate a clear knowledge of the main concepts presented in the week’s assigned materials and an ability to analyze and apply these concepts to the prompt.

Things you can expect from me:

1. I will open units at least 3 days before any graded work is due (all modules will open at the end of the day on the Friday before the module is scheduled).

2. I will have weekly assignments graded within 7 business days and exams/final projects within a maximum of 14 business days.

3. I will respond to emails and forum questions within 1 business day.

4. Regular and consistent feedback which will include:
   - Weekly announcements summarizing the module content, learning activities, and graded assignments for each module.
   - An opportunity to ask questions about the course in the Course Questions Forum, by email, or by Blackboard Messenger. Please see anticipated response time above.
Feedback on assignments utilizing assignment rubrics, specific comments, and one to one meetings (when requested).

What to do if you have questions about the course:

There are two ways to contact me if you have questions concerning this course.

1. If you have a general question (one that does not involve sharing personal information about yourself) that other students may also be asking, you should post your question to the course questions forum. I will answer via this forum, and you can also answer each other’s questions as appropriate. Your question and our answer will be sent to everyone in the class. Some examples of the types of question you might post here are questions about assignments, letting us know an assignment or resource is not available, due dates, etc.

2. If you have a personal question that involves sharing personal information you should email your instructor directly at Immurray@umbc.edu I will respond to your question via email.

3. If your problem is related to Blackboard, you must submit an RT ticket, which will be addressed by the Technology Support Center (TSC) or instructional technology staff with Blackboard experience. You can access the RT request directly via https://doit.umbc.edu/request-tracker-rt/doit-myumbc-blackboard/ or via the link available in the eLearning Resource section of the Start Here module or via the Request Help (RT) content area on our course homepage. Please be as detailed and descriptive as possible. Include your CourseID, screen captures or any error messages you receive.

Relevant Course Policies

Absences

While this is an asynchronous, online class it is important that you are ‘present’ i.e. participate regularly in our class and complete the assignments/activities each week of this semester. As with face to face classes, circumstances may occur that cause a student to be absent (i.e. unable to complete the assignments/activities) from class. For individual or very short-term absences, students should contact their instructors as soon as possible to determine a plan of action. In the event of an extended absence, the student should consult with their course instructor and academic advisor to explore options such as an incomplete grade or a course/term withdrawal. Students may refer to https://registrar.umbc.edu/services/registration/information-about-withdrawal-and-absence/ for further information

Incomplete Grade

Students with extended absences near the end of a semester may consider requesting an incomplete grade from the course instructor under exceptional circumstances for course work that is qualitatively satisfactory but, for reasons beyond the student’s control, cannot be completed by the end of the semester.
Students may refer to https://registrar.umbc.edu/services/registration/information-about-withdrawal-and-absence/ for further information

Student Disability Services (SDS)

UMBC is committed to eliminating discriminatory obstacles that may disadvantage students based on disability. Services for students with disabilities are provided for all students qualified under the Americans with Disabilities Act (ADA) of 1990, the ADAAA of 2009, and Section 504 of the Rehabilitation Act who request and are eligible for accommodations. The Office of Student Disability Services (SDS) is the UMBC department designated to coordinate accommodations that would allow students to have equal access and inclusion in all courses, programs, and activities at the University.

If you have a documented disability and need to request academic accommodations for access to your courses, please refer to the SDS website at sds.umbc.edu for registration information and to begin the process, or alternatively you may visit the SDS office in the Math/Psychology Building, Room 212. For questions or concerns, you may contact us through email at disAbility@umbc.edu or phone (410) 455-2459.

If you require accommodations for this class, make an appointment to meet with me to discuss your SDS-approved accommodations.

Academic Integrity

Academic integrity is an important value at UMBC. By enrolling in this course, each student assumes the responsibilities of an active participant in UMBC’s scholarly community in which everyone’s academic work and behavior are held to the highest standards of honesty. Cheating, fabrication, plagiarism, and helping others to commit these acts are all forms of academic dishonesty, and they are wrong. Academic misconduct could result in disciplinary action that may include, but is not limited to, suspension or dismissal.

- Plagiarism is intentionally or knowingly presenting the work of another as one’s own (i.e., without proper acknowledgement of the source). The sole exception to the requirement of acknowledging sources is when the ideas, information, etc., are common knowledge.
- Typical Examples: Submitting as one’s own work of a "ghost writer" or commercial writing service; directly quoting from a source without citation; cutting and pasting information directly from websites; paraphrasing or summarizing another’s work without acknowledging the source; using facts, figures, graphs, charts or information without acknowledgement of the source. Plagiarism may occur orally and in writing. It may involve computer programs and files, research designs, distinctive figures of speech, ideas and images, or generally any "information" which belongs to another.
Title IX Statement

As an instructor, I am considered a Responsible Employee, per UMBC’s Policy on Prohibited Sexual Misconduct, Interpersonal Violence, and Other Related Misconduct (located at http://humanrelations.umbc.edu/sexual-misconduct/umbc-resource-page-for-sexual-misconduct-and-other-related-misconduct/ ). While my goal is for you to be able to share information related to your life experiences through discussion and written work, I want to be transparent that as a Responsible Employee I am required to report disclosures of sexual assault, domestic violence, relationship violence, stalking, and/or gender-based harassment to the University’s Title IX Coordinator. As an instructor, I also have a mandatory obligation to report disclosures of or suspected instances of child abuse or neglect (www.usmh.usmd.edu/regents/bylaws/SectionVI/V1150.pdf ).

The purpose of these reporting requirements is for the University to inform you of options, supports and resources; you will not be forced to file a report with the police. Further, you are able to receive supports and resources, even if you choose to not want any action taken. Please note that in certain situations, based on the nature of the disclosure, the University may need to take action.

For UMBC Main Campus Students:
If you need to speak with someone in confidence about an incident, the following Confidential Resources are available to support you:
The Counseling Center: 410-455-2472
University Health Services: 410-455-2542
(After-hours counseling and care available by calling campus police at 410-455-5555)
Other on-campus supports and resources:
The Women’s Center, 410-455-2714
Title IX Coordinator, 410-455-1606
Additional on and off campus supports and resources can be found at:

For Shady Grove Campus Students:
If you need to speak with someone in confidence about an incident, the following Confidential Resources are available to support you:
Universities at Shady Grove Campus Resources Center for Counseling and Consultation: 301-738-6273
Other on-campus supports and resources:
John Brandt, USG Title IX Liaison: 301-738-6021

Classroom Conduct

I will conduct this class in an atmosphere of mutual respect. I encourage your active participation in class discussions. Each of us may have strongly differing opinions on the various topics of class discussions. The conflict of ideas is encouraged and welcome. The orderly
questioning of the ideas of others, including mine, is similarly welcome. However, I will exercise my responsibility to manage the discussions so that ideas and argument can proceed in an orderly fashion. You should expect that if your conduct during class discussions seriously disrupts the atmosphere of mutual respect I expect in this class, you will not be permitted to participate further.

Syllabus revision policy

The standards and requirements set forth in this syllabus may be modified at any time by the course instructor. Notice of such changes will be by announcement in class [or by written or email notice][or by changes to this syllabus posted on the course website].

Learner Support

Detailed Student Support Services are outlined in the Start Here content area of our course on the Start Here with eLearning Resources page.

Summary of Assignments:

Please see Blackboard for specific due dates/times.

- All assignments will be submitted by Blackboard. Please make sure you are familiar with the correct procedures for doing this. Instances of the submission of emailed, incorrectly formatted, corrupt, or blank documents will be considered as non-submissions and a 0 awarded for the assignment.

You should be sure to save copies of all assignments and papers for this course, as the risk of technological issues is high in a 100% online course.

1. Weekly assignments: For this course, there will be weekly short assignments worth 5-25 points each depending on the activity. Each week, you will log onto the Blackboard system and find out what that week's materials and assignments are. The material will be posted at least 3 days before assignments are due, and for some assignments you may submit early if you wish; for other assignments – those that require interacting online with your classmates – the work must be done on the assigned day. You will study and explore the week’s material and complete a number of assignments. All assignments are due before 11:55 p.m. EDT on their due date. Specific details about the assignment are posted each week. These assignments will be graded and the scores posted on Blackboard within 7 business days.

2. A short midterm exam consisting of multiple choice and short answer questions will be given.
3. A short final exam consisting of multiple choice and short answer questions will be given.

4. A final paper & presentation is assigned and this should be a semester long project i.e. please do not attempt to complete these projects the week that they are due only. Detailed instructions and rubrics are available on our course page. Each option will involve a 6-10 page (double-spaced submission).
   - Final Paper - You will choose between four options for the topic/format of your final paper.
   - Presentation. Guidelines: Your presentation will not be a summary of your project/paper but a presentation of one or two aspects of the assignment that are relevant to our coursework. You will make connections to our coursework in your presentations. Format: For our final project/paper presentations we will base our presentations on the Pecha Kucha model. This model follows a format of a designated number of slides that are image and not word based, and a fast paced presentation style.

5. No extra credit is offered for this course.

Grading Scheme:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Points</th>
<th>% Course Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introduction Activities</td>
<td>30</td>
<td>6%</td>
</tr>
<tr>
<td>Weekly Activities</td>
<td>12 x 20 points each = 240 points</td>
<td>4% each = 48% total</td>
</tr>
<tr>
<td>Concluding Activities</td>
<td>30</td>
<td>6%</td>
</tr>
<tr>
<td>Midterm Exam</td>
<td>50</td>
<td>10%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>50</td>
<td>10%</td>
</tr>
<tr>
<td>Final Paper</td>
<td>50</td>
<td>10%</td>
</tr>
<tr>
<td>Final Presentation</td>
<td>50</td>
<td>10%</td>
</tr>
<tr>
<td>TOTAL</td>
<td>500 points</td>
<td>100%</td>
</tr>
</tbody>
</table>

Grading Scale: Grades are determined by dividing the total points by 5.0 and applying the following scale: A (90-100), B (80-89.9), C (70-79.9), D (60-69.9), F (<60).
Late Work Policy

Assignments will not be graded if submitted late – a 0 will be assigned for that assignment with the exception of a documented, excused absence.

Excused, documented, verified absences: In cases of late work due to absences that would meet the criteria of absence accommodations please request Absence Verification. It is important that you notify Dr. Murray if you have a documented absence and will not be able to complete the assignments on time prior to the due date for that assignment. If you do not notify Dr. Murray as soon as possible after the missed submission, no accommodations will be made for absence i.e. a 0 will be entered for that assignment.

</thead>
<tbody>
<tr>
<td>Overview and Objectives:</td>
</tr>
<tr>
<td>After completing this section you will become familiar with both dementia and Alzheimer’s disease. You will complete an individual activity. After completing this section and this activity you will be able to:</td>
</tr>
<tr>
<td>MO1: Define dementia, Alzheimer’s disease, and related disorders (Aligns with Course Objective 2).</td>
</tr>
<tr>
<td>MO2: Demonstrate an understanding of the relationship between dementia, Alzheimer’s disease, and related disorders (Aligns with Course Objectives 1 and 2).</td>
</tr>
<tr>
<td>MO3: Evaluate the psychosocial impact of dementia (Aligns with Course Objectives 3 and 4)</td>
</tr>
</tbody>
</table>

Learning activities summary:
1. Review the power point - Overview.
2. Review the two assigned articles:
3. Read Chapters 1 & 2 in Sabat (2018)
Module 3: The Diagnosis of Dementia/Alzheimer’s Disease

Overview and Objectives:
In this section you will explore the path to the diagnosis of dementia and Alzheimer’s disease. After these activities you will be able to:
MO1: Describe the pathway of the diagnosis dementia and Alzheimer’s disease (Aligns with Course Objectives 1 -3)
MO2: Explain the implications of early diagnosis and disclosure of the diagnosis (Aligns with Course Objectives 1 -3)
MO3: Summarize the implications and issues involved for the person diagnosed, their family members, and health care professionals (Aligns with Course Objectives 1 -4)

Learning Activities Summary:
1. Review the power point provided.
2. Review the articles:
3. Read Sabat Chapter 3
4. Review Alzheimer’s Association: Principles for a Dignified Diagnosis
5. Review Alzheimer’s Association: Know the 10 Signs

Graded Assignment Summary:
Complete Assignment 2 (20 points)
True/False Statements and Rationale (Aligns with Module Objectives 1-3)
Module 4: MCI & Progression of Alzheimer’s Disease

Overview and Objectives:
In this section we will explore mild cognitive impairment and the different stages of Alzheimer's disease. After these activities you will be able to:
MO 1: Describe MCI and its relationship to dementia
MO2: Summarize the various stages of Alzheimer's disease
MO3: Evaluate the usefulness and the limitations of assigning 'stages' to the symptoms of Alzheimer's disease for the person diagnosed, caregivers, and clinicians

Learning Activities Summary:
1. Review the power point provided
3. Review the National Institute on Aging and the Alzheimer's Association information on stages/symptoms of AD
4. Review two scales commonly used assigning stages to the progression of Alzheimer's disease/dementia: the Reisberg Global Deterioration Scale (GDS) and the Clinical Dementia Rating (CDR)
5. Review the video: BBC News - Dementia: A Month in the Life

Graded Assignment Summary:
Complete Assignment 3 (20 points)
Create an Infographic (Aligns with Module Objectives 1-3)
Module 5: Related Disorders

Overview and Objectives:
In this section you will explore other forms of irreversible dementia other than Alzheimer's disease. After these activities you will be able to:
MO1: Define and briefly describe the most common forms of irreversible dementia
MO2: Summarize the common and unique characteristics of each and compare each form to Alzheimer's disease
MO3: Identify the characteristics distinguishing each condition from Alzheimer's disease

Learning activities summary:
1. Review the information on the different types of dementia in the articles assigned in week 1 (the Sounder and Jolley articles)
2. Review the power point
3. Review the information on the websites provided (links provided in Resources) and focus on Vascular dementia, Lewy body dementia, Frontotemporal dementia, Mixed dementia and Parkinson's disease dementia:
   - Alzheimer's Association - Types of dementia: This information from the Alzheimer's Association provides a summary of the more common forms of irreversible dementia.
   - NIA: Alzheimer's Disease Education and Referral Center - About Alzheimer's Disease: Other Dementias: This information from the NIA provides a summary of the more common forms of irreversible dementia

Graded assignment summary:
Complete Assignment 4 (20 points)
Related Disorders Group Project (Aligns with Module Objectives 1-3)
Module 6: Person Centered Care: The Person at the Center of the Experience

Overview and Objectives:
In this section we will explore the person-centered care approach to the care of those with dementia. After these activities you will be able to:

1. Describe the philosophy of person-centered care
2. Identify the psychosocial needs of persons with dementia as identified by Kitwood
3. Summarize how these needs can be threatened by the environment surrounding those with dementia
4. Appraise how these needs and the selfhood (Self 1, 2, and 3) of persons with dementia can be supported in the formal care environment by the philosophy of person-centered care

Learning activities summary:
1. Review the power point
2. Watch the video - Person Centered Matters by the Dementia Action Alliance (15 mins 47 sec)
3. Read Sabat Chapter 5
4. Read the three articles:

Graded assignment summary:
Complete Assignment 5 (20 points)
Person Centered Care Discussion Forum (Aligns with Module Objectives 1-4)
Module 7: Perceptions and Dementia

Overview and Objectives:
In this section we will explore societal perceptions of those impacted by Alzheimer’s disease and dementia and the impact of cultural and social perceptions on the well-being and quality of life of those living with dementia.
After these activities you will be able to:
MO1: Distinguish the implications of negative stereotypes and representations of people with dementia
MO2: Describe how such perceptions can impact quality of life and well-being
MO3: Identify the origins of such perceptions
MO4: Outline interventions and approaches that may decrease negative perceptions and stigma in relation to Alzheimer's disease and dementia

Learning activities summary:
1. Review the power point
2. Read the three articles:

Graded assignment summary:
Complete Assignment 6 (20 points)
Perceptions of Dementia Discussion Forum (Aligns with Module Objectives 1-4)

Midterm Exam (50 points)
Multiple Choice/True-False/Short Answer Questions
Module 8: Communication and Dementia

Overview and Objectives:
In this section we will explore communication challenges and strategies in all stages of the disease progression for those diagnosed and caregivers. After these activities you will be able to:
MO1: Summarize the relationship between communication and the psychosocial needs of those living with dementia (Aligns with Course Objective 3 & 4)
MO2: Describe how malignant social psychology can impact the well-being of persons with dementia in formal and informal care settings (Aligns with Course Objectives 3 & 4)
MO3: Explain some of the communication challenges that people living with dementia may face (Aligns with Course Objective 3)
MO4: Outline the adaptive strategies that we can utilize when communicating with persons with dementia (Aligns with Course Objectives 1-4)

Learning activities summary:
1. Review the power point
2. Read the articles:

Graded assignment summary:
Complete Assignment 7 (20 points)
Reading Response Communication and Dementia (Aligns with Module Objectives 1-4)
Module 9: Social roles

Overview and Objectives:
In this section we will explore social roles in the context of those with dementia and their informal caregivers. After these activities you will be able to:
MO1: Identify the complexities of the adaptation to the changes that occur with a diagnosis for the person diagnosed and family members/friends (Aligns with Course Objectives 1-4)
MO2: Define a social role and describe how the psychosocial environment may help support or threaten such roles when faced with dementia (Aligns with Course Objectives 1-4)
MO3: Summarize the diversity of the experience of dementia for all impacted (Aligns with Course Objective 1-4)
MO4: Describe coping strategies that can be employed by persons with dementia and their caregivers (Aligns with Course Objectives 3 & 4)

Learning activities summary:
1. Review the power point
2. Read the articles:
3. Read Sabat Chapter 4
4. Watch the short videos – Paul and Bill and How to Live With Dementia

Graded assignment summary:
Complete Assignment 8 (20 points)
Social Roles Discussion Forum (Aligns with Module Objectives 1-4)
Module 10: Practical Decisions

Overview and Objectives:
In this section we will explore practical decisions and challenges in all stages of the disease progression for those diagnosed and caregivers. After these activities you will be able to:
MO1: Analyze the diversity of the experience of dementia for all impacted (Aligns with Course Objectives 1-4)
MO2: Describe the complexities of the practical decisions that may need to be made when faced with a diagnosis of dementia for the person diagnosed and family members/friends (Aligns with Course Objectives 1-4)
MO3: Outline the challenges of balancing person-centered care/choice and safety/well-being as the symptoms of dementia progress for both formal and informal caregivers. (Aligns with Course Objectives 1-3)
MO4: Identify and discuss aspects of home safety for PWD and strategies that may address these concerns. (Aligns with Course Objectives 1-3)
MO5: Describe why driving cessation is often identified as the most difficult transition for PWD and their family members. (Aligns with Course Objectives 1-3)

Learning activities summary:
1. Review the power point
2. Read the articles by O’Connor et al (2013) and Giebel et al. (2014) and Marquardt et al. (2011).
3. Review the 4 short video clips 'Driving and Dementia'
4. Review the Alzheimer's Association Brochure 'Staying Safe'

Graded assignment summary:
Complete Assignment 9 (20 points)
Practical Decisions Group Project (Aligns with Module Objectives 1-5)
Module 11: Cultural Contexts & Diversity

Overview and Objectives:
In this section we will explore the diversity of the population impacted by Alzheimer’s disease and dementia and the impact of cultural and individual factors on perceptions of dementia, caregiving and help seeking behaviors. After these activities you will be able to:
MO1: Understand the diversity of persons with dementia
MO2: Describe how culture and ethnicity may shape perceptions of dementia and the experience of dementia
MO3: Identify both commonalities and unique characteristic of the experience of dementia
MO4: Assess how the culture of the formal care environment can impact the well-being of persons with dementia

Learning activities summary:
1. Review the power point
2. Read the three assigned articles:
3. Review the video Life Part 2: Diversity and Aging (3 mins 30 sec)

Graded assignment summary:
Complete Assignment 10 (20 points)
True/False Statements and Rationale (Aligns with Module Objectives 1-4)
Module 12: Caregiving

Overview and Objectives:
In this section we will explore informal caregiving and Alzheimer’s disease and dementia and formal community based services as they apply to both persons with dementia and their care partners. After these activities you will be able to:
MO1: Define informal caregiving
MO2: Describe some of the challenges faced by informal caregivers when providing care for a person with dementia
MO3: Outline how these challenges may differ or be similar to those faced by caregivers of older adults without cognitive impairment
MO4: Explain how formal services and informal caregivers may work together to support those living with dementia

Learning activities summary:
1. Review the power point
2. Watch the short Fictional YouTube video 'My Name is Lisa'
3. Read the four articles
   - Gaugler, J.E., Mittelman, M.S., Hepburn, K., & Newcomer, R. (2010). Clinically significant changes in burden and depression among dementia caregivers following nursing home admission. Bmc Medicine, 8(85), 1-14.

Graded assignment summary:
Complete Assignment 11 (20 points)
Caregiving Discussion Forum (Aligns with Module Objectives 1-4)
Module 13: Service Use

Overview and Objectives:

In this section we will explore the experience of those impacted by Alzheimer’s disease and dementia as they negotiate the health and residential long term care system. We will explore the implementation of the person centered care philosophy of care within these care environments.

After these activities you will be able to:

MO1: Explain how the implications of negative stereotypes and representations of people with dementia may impact health and long term care provision

MO2: Describe how the psycho-social environment can impact the well-being of those with dementia in formal care environments

MO3: Identify the characteristics of a culture change nursing home

MO4: Discuss the impact of culture change on quality of life and quality of care for those residing in nursing homes.

Learning activities summary:

1. Review the power point
2. Read Sabat Chapter 6 & 7
3. Read the three articles: Maslow (2013), McCormack et al. (2012), and Murray & Boyd (2009).

Graded assignment summary:

Complete Assignment 12 (20 points)
Service Use Discussion Forum (Aligns with Module Objectives 1-4)

Final Paper & Presentation

Final Paper Due (50 points)
Presentation Due (50 points)

Module 14: Wrap Up

Wrap up Discussion Forum (10 points)
Course reflection paper (20 points)

AGNG 355: Instructor Interaction

Instructor and Course Questions Information Contained in Start Here Module

1. An introductory video is provided where the Instructor introduces herself to the class.

2. Information in the ‘About your Instructor’ section:

Email: Immurray@umbc.edu
Office phone: 443-543-5644
Office hours: In person, by phone or virtual meetings available by appointment.
Assignments will be graded and feedback provided within 7-14 business days.
I return messages within 48 hours, excluding breaks and weekends
If you have a general question (one that does not involve sharing personal information about yourself) that other students may be asking, you should post your question to The course question forum.

3. What to do if you have questions about the course (embedded in Start Here Module):

There are two ways to contact me if you have questions concerning this course. If you have a general question (one that does not involve sharing personal information about yourself) that other students may be asking, you should post your question to the course questions forum. I will answer via this forum, and you can also answer each other’s questions as appropriate. Your question and our answer will be seen by everyone in the class. Some examples of the types of question you might post here are questions about assignments, letting us know an assignment or resource is not available, due dates, etc.

If you have a personal question that involves sharing personal information you should email your instructor directly at Immurray@umbc.edu I will respond to your question via email.

4. Course Questions Discussion Forum (ungraded, embedded at the start of the course):

I will answer when applicable but you can also answer each other’s questions as appropriate. Your question and our answer will be sent to everyone in the class. Some examples of the types of question you might post here are questions about assignments, letting us know an assignment or resource is not available, due dates, etc.

If you have a personal question that involves sharing personal information you should email your instructor directly at Immurray@umbc.edu and I will respond to your question via email.
AGNG 355: The Experience of Dementia

Course Map

Course Description. This course will provide an overview of Alzheimer’s disease and other forms of dementia using person-centered philosophy. The experience of dementia will be explored from the perspectives of the person diagnosed, family members and friends, and informal and formal caregivers. Students will gain a holistic insight into these disorders and their implications for both individuals and communities. The foundational concept of this course will be the personhood of those diagnosed and living with dementia.

Course Objectives. Upon completion of the course the learner will be able to:
1. Demonstrate an understanding of Alzheimer’s disease and related disorders that goes beyond the pathology and medical implications of the disease and incorporates the implications for individuals, families, care providers, and society.
2. Summarize the biological, social, and psychological implications of Alzheimer’s disease and related disorders.
3. Evaluate the diversity of the disease and its impact on individuals.
4. Analyze how societal and cultural factors impact persons with dementia and their loved ones and serve to shape their experience.

**Reading Response Rubric**

These reading responses are designed to assess your interpretation and analysis of the assigned module materials. Therefore, it is important that you base your responses on the information provided in these materials and do not simply provide a summary of your knowledge before starting this course.

1. Comprehensive response will include:
   - integration of all relevant assigned module articles and additional materials into the response (5 points)
   - interpretation and analysis of the readings provided (5 points)
   - evidence of your completion of the course materials and your understanding of each (5 points)

dementia (Aligns with Course Objectives 3 and 4) 

| Points |  
|--------|---
| Please do not include sections of the articles etc. as direct quotes – all information must be paraphrased. I am looking for you to base your responses to the prompt on the assigned materials. In order to do this you must correctly cite all material that is not ‘common knowledge’ in correct APA format. For information on how to cite material correctly please review the resources on the Perdue OWL website: https://owl.english.purdue.edu/owl/resource/560/01/ (Links to an external site.)  
| 2. Please cite the power point itself and not the references given on the slides. (2.5 points)  
| 3. In these responses I will also be assessing your: organization and grammar – please spellcheck and avoid the use of social media abbreviations etc. (2.5 points) |
**Module 3: The Diagnosis of Dementia/Alzheimer's Disease**

**Overview and Objectives:**
In this section you will explore the path to the diagnosis of dementia and Alzheimer's disease. After these activities you will be able to:

- **MO1:** Describe the pathway of the diagnosis dementia and Alzheimer's disease (Aligns with Course Objectives 1-3)
- **MO2:** Explain the implications of early diagnosis and disclosure of the diagnosis (Aligns with Course Objectives 1-3)
- **MO3:** Summarize the implications and issues involved for the person diagnosed, their family members, and health care

## Module 4: MCI & Progression of Alzheimer’s Disease

**Weekly Announcement and module summary posted. Student - Instructor Interaction**

### Overview and Objectives:
In this section we will explore mild cognitive impairment and the different stages of Alzheimer’s disease. After these activities you will be able to:
- MO 1: Describe MCI and its relationship to dementia
- MO2: Summarize the various stages of Alzheimer's disease
- MO3: Evaluate the usefulness and the limitations of assigning 'stages' to the symptoms of Alzheimer’s disease for the person diagnosed, caregivers, and clinicians.

### Learning Activities Summary:
1. Review the power point provided
3. Review the National Institute on Aging and the Alzheimer's Association information on stages/symptoms of AD
4. Review two scales commonly used assigning stages to the progression of Alzheimer’s disease/dementia: the Reisberg Global Deterioration Scale (GDS) and the Clinical Dementia Rating (CDR)
5. Review the video: BBC News - Dementia: A Month in the Life

### Graded Assignment Summary:
**Graded Assignment Summary:**
Create an infographic (Aligns with Module Objectives 1-3) 20 points
Using the materials contained in this module, please create a visual aid to outline the progression of Alzheimer’s disease.
- You will be creating this infographic as if you were educated the general public about the course of progression of Alzheimer’s disease.
- Please also include how MCI may fit in to this progression.

You can create this visual aid as a power point slide, a flow chart in a word document, a concept map, an infographic etc. Please limit your visual aid to a one-sided pdf or word document.

When creating this visual aid be sure to:
- provide accurate, clearly articulated information
- provide a comprehensive overview of the progression of the disease
- create a visual aid that is easy to understand and follow

Some resources that may be helpful to you:
- What is visual thinking and learning
  - [http://www.inspiration.com/visual-learning](http://www.inspiration.com/visual-learning) (Links to an external site.)

Module 5: Related Disorders

Overview and Objectives:
In this section you will explore other forms of irreversible dementia other than Alzheimer’s disease. After these activities you will be able to:

MO1: Define and briefly describe the most common forms of irreversible dementia

MO2: Summarize the common and unique characteristics of each and compare each form to Alzheimer’s disease

MO3: Identify the characteristics distinguishing each condition from Alzheimer’s disease

Learning activities summary:
1. Review the information on the different types of dementia in the articles assigned in week 1 (the Sounber and Jolley articles)
2. Review the power point
3. Review the information on the websites provided (links provided in Resources) and focus on Vascular dementia, Lewy body dementia, Frontotemporal dementia, Mixed dementia and Parkinson’s disease dementia:
   - Alzheimer’s Association - Types of dementia: This information from the Alzheimer’s Association provides a summary of the more common forms of irreversible dementia.
   - NIA: Alzheimer’s Disease Education and Referral Center - About Alzheimer’s Disease: Other Dementias: This information from the NIA provides a summary of the more common forms of irreversible dementia

Graded assignment summary:
Related Disorders Group Project (Aligns with Module Objectives 1-3) 20 points
Using this week’s assigned materials please complete following table that outlines for the most common forms of irreversible dementia other than Alzheimer’s disease.
1. You should produce a final table that is formatted and reads as a cohesive document. Citations are required in this assignment. (5 points)
   Please ensure that no information provided is directly from websites i.e. you must summarize and paraphrase the information. Any information that is directly quoted or 'cut and pasted' from any sources including websites will result in a ‘0’ for the assignment.
2. Definition (5 points)
3. Unique characteristics i.e. why is it different than Alzheimer’s disease? (5 points)
4. Similar characteristics i.e. why is it similar to Alzheimer’s disease? (5 points)
5. Onset (i.e. at what age may is usually start, does it start gradually etc.) & Population most commonly affected. (5 points)

### Module 6: Person Centered Care: The Person at the Center of the Experience

**Overview and Objectives:**
In this section we will explore the person-centered care approach to the care of those with dementia. After these activities you will be able to:
- MO1: Describe the philosophy of person-centered care
- MO2: Identify the psychosocial needs of persons with dementia as identified by Kitwood
- MO3: Summarize how these needs can be threatened by the environment surrounding those with dementia
- MO4: Appraise how these needs and the selfhood (Self 1, 2, and 3) of persons with

  1. Review the power point
  2. Watch the video - Person Centered Matters by the Dementia Action Alliance (15 mins 47 sec)
  3. Read Sabat Chapter 5
  4. Read the three articles:

**Graded assignment summary:**
- Person Centered Care Discussion Forum (Aligns with Module Objectives 1-4) 20 points

By the end of the day on Wednesday please respond to the following prompts (your discussion should reflect not just your personal opinion but also the assigned readings):
- Describe four principles of the philosophy of person-centered care for persons with dementia.
- Describe two of the psychosocial needs of persons with dementia as identified by Kitwood and for each discuss how these needs may be threatened by the environment surrounding those with dementia
- How do you think these needs and the selfhood (Self 1, 2, and 3) of persons with dementia can be supported in the formal care environment by the philosophy of person-centered care

By the end of the day on Friday also respond to the response of two of your peers in a way that reflects critical thinking and adds to the discussion i.e. do not just simply agree.

**In order that you meet the requirements for this discussion forum please review the rubric below:**
These discussion responses are designed to assess your interpretation and analysis of the assigned module materials. Therefore, it is important that you base your responses on the information provided in these materials and do not simply provide a summary of your knowledge before starting this course.

**Required components:**
1. Post an original response that reflects the assigned coursework in detail (10 points)

Dementia can be supported in the formal care environment by the philosophy of person-centered care.

- You should clearly indicate the purpose of your post.
- You should cite our course materials to support your statements/position i.e. I am looking for Integration of all relevant assigned module articles and additional materials into the response and your interpretation and analysis of the readings provided.
- Posts need to be completed by the deadline in order that others have time to reply.

2. Respond/reply to a minimum of 2 discussion posts per forum (5 points)

- Replies should be substantive and reflective.
- Replies should expand upon the conversation or respond to a question posed in the original response.
- Overall your comments/questions should enhance the quality of the discussion and your comments/questions should provide evidence that the participant read text and postings.
- Ideas/concepts should be expressed in a clear and coherent manner.

3. All information must be paraphrased in your own words. Please do not include sections of the articles etc. as direct quotes (2.5 point)

4. In these responses I will also be assessing your organization and grammar – please spellcheck and avoid the use of social media abbreviations etc. (2.5 point)
### Module 7: Perceptions and Dementia

**Overview and Objectives:**
In this section we will explore societal perceptions of those impacted by Alzheimer's disease and dementia and the impact of cultural and social perceptions on the well-being and quality of life of those living with dementia. After these activities you will be able to:

- **MO1:** Distinguish the implications of negative stereotypes and representations of people with dementia.
- **MO2:** Describe how such perceptions can impact quality of life and well-being.
- **MO3:** Identify the origins of such perceptions.
- **MO4:** Outline interventions and approaches that may

#### Learning activities summary:
1. Review the power point
2. Read the three articles:

#### Graded assignment summary:
**Perceptions of Dementia Discussion Forum** (Aligns with Module Objectives 1-4) 20 points
For this assignment the class will be divided into randomly assigned groups of 7 or 8 students - you will only see the discussion of the people in your group and will not be able to see other people's discussion until you have made your own first entry.

By the end of the day on Wednesday please respond to the following prompts (your discussion should reflect not just your personal opinion but also the assigned readings).
- After you have reviewed this week’s materials and considered how societal perceptions of dementia and the language we use and images we portray can impact those with dementia please watch the two following video clips.
- [Alzheimer’s Disease: Every Minute Counts – 1 min and 52 sec](https://www.pbs.org/video/alzheimers-every-minute-counts-alzheimers-every-minute-counts/) (Links to an external site.)

Living with Alzheimer’s and Dementia – please just watch the introduction – the first 1 min and 56 secs - [https://www.pbs.org/video/alzheimers-and-dementia/](https://www.pbs.org/video/alzheimers-and-dementia/) (Links to an external site.)

As you watch for each clip separately please describe:
- What do you see?
- What do you hear?
- What is the message?
- How does this video clip make you feel about dementia and persons with dementia?

Describe one way in which these clips relate to each of the assigned articles for this module.

By the end of the day on Friday also respond to the
response of two of your peers in a way that reflects critical thinking and adds to the discussion i.e. do not just simply agree.

**Discussion Forum Rubric:**
These discussion responses are designed to assess your interpretation and analysis of the assigned module materials. Therefore, it is important that you base your responses on the information provided in these materials and do not simply provide a summary of your knowledge before starting this course.

**Required components:**
1. Post an original response that reflects the assigned coursework in detail *(10 points)*
   - You should clearly indicate the purpose of your post
   - You should cite our course materials to support your statements/position i.e. I am looking for integration of all relevant assigned module articles and additional materials into the response and your interpretation and analysis of the readings provided
   - Posts need to be completed by the deadline in order that others have time to reply
2. Respond/reply to a minimum of 2 discussion posts per forum *(5 points)*
   - Replies should be substantive and reflective
   - Replies should expand upon the conversation or respond to a question posed in the original response
   - Overall your comments/questions should enhance the quality of the discussion and your comments/questions should provide evidence that the participant read text and postings
- Ideas/concepts should be expressed in a clear and coherent manner
3. All information must be paraphrased in your own words Please do not include sections of the articles etc. as direct quotes (2.5 point)
4. In these responses I will also be assessing your organization and grammar – please spellcheck and avoid the use of social media abbreviations etc. (2.5 point)
### Module 8: Communication and Dementia

#### Overview and Objectives:
In this section we will explore communication challenges and strategies in all stages of the disease progression for those diagnosed and caregivers. After these activities you will be able to:

- **MO1**: Summarize the relationship between communication and the psychosocial needs of those living with dementia (Aligns with Course Objective 3 & 4)
- **MO2**: Describe how malignant social psychology can impact the well-being of persons with dementia

#### Learning activities summary:

| dementia for all impacted (Aligns with Course Objective 1-4) MO4: Describe coping strategies that can be employed by persons with dementia and their caregivers (Aligns with Course Objectives 3 & 4) | your statements/position i.e. I am looking for Integration of all relevant assigned module articles and additional materials into the response and your interpretation and analysis of the readings provided
- Posts need to be completed by the deadline in order that others have time to reply

2. Respond/reply to a minimum of 2 discussion posts per forum (5 points)
- Replies should be substantive and reflective
- Replies should expand upon the conversation or respond to a question posed in the original response
- Overall your comments/questions should enhance the quality of the discussion and your comments/questions should provide evidence that the participant read text and postings
- Ideas/concepts should be expressed in a clear and coherent manner

3. All information must be paraphrased in your own words Please do not include sections of the articles etc. as direct quotes (2.5 point)

4. In these responses I will also be assessing your organization and grammar – please spellcheck and avoid the use of social media abbreviations etc. (2.5 point) |
### Module 10: Practical Decisions

**Overview and Objectives:**
In this section we will explore practical decisions and challenges in all stages of the disease progression for those diagnosed and caregivers. After these activities you will be able to:

- **MO1:** Analyze the diversity of the experience of dementia for all impacted ( Aligns with Course Objectives 1-4 )
- **MO2:** Describe the complexities of the practical decisions that may need to be made when faced with a diagnosis of dementia for the person diagnosed and family members/friends ( Aligns with Course Objectives 1-4 )
- **MO3:** Outline the

### Graded assignment summary:
Practical Decisions Group Project (Aligns with Module Objectives 1-5) 20 points

Using your knowledge of the progression and stages of Alzheimer’s disease identify possible safety issues that may arise for persons diagnosed and their family members in the middle, and late stages of the disease.

**Assignment Rubric**
For your assigned scenario analysis (labeled with 'Analysis' and 'your name' next to the scenario) please discuss:

- the main safety issues you identify (2.5 points)
- the possible implications of the situation and challenges for the person with dementia in terms of transition points and decisions to be made (7.5 points)
- the possible implications for the caregiver(s)/family member(s) in the scenario (5 points)

Once your group members have provided their responses, for your assigned SCENARIO response (labeled with 'Response' and 'your name' next to the scenario) discuss:

- resources/strategies that you think may be useful to the caregiver and/or person with dementia in this situation (2.5 points)
- barriers that may exist that could prevent the use of these resources/strategies (2.5 points)

challenges of balancing person-centered care/choice and safety/well-being as the symptoms of dementia progress for both formal and informal caregivers. (Aligns with Course Objectives 1-3)

MO4: Identify and discuss aspects of home safety for PWD and strategies that may address these concerns. (Aligns with Course Objectives 1-3)

MO5: Describe why driving cessation is often identified as the most difficult transition for PWD and their family members. (Aligns with Course Objectives 1-3)
**Module 11: Cultural Contexts & Diversity**

**Overview and Objectives:**
In this section we will explore the diversity of the population impacted by Alzheimer’s disease and dementia and the impact of cultural and individual factors on perceptions of dementia, caregiving and help seeking behaviors. After these activities you will be able to:

- **MO1:** Understand the diversity of persons with dementia
- **MO2:** Describe how culture and ethnicity may shape perceptions of dementia and the experience of dementia
- **MO3:** Identify both commonalities and unique characteristic of the experience of dementia

**Learning activities summary:**
1. Review the power point  
2. Read the three assigned articles:  
3. Review the video Life Part 2: Diversity and Aging (3 mins 30 sec)

**Graded assignment summary:**
- True/False Statements and Rationale (Aligns with Module Objectives 1-4) 20 points  
  In a one-page, single spaced word document (1 page for all four questions together) please review the four statements below.  
  For each statement state whether you feel it to be true or false and for each you then need to provide evidence in the form of three specific statements (from our assigned module readings only).  
  All statements should be paraphrased i.e. written in your own words and you will need to cite the source(s) of each of your statements.  
  Please provide your response as per the format below i.e. please cut and paste the section below in to your assignment. Statement 1: Persons with dementia and their caregivers across all cultural/ethnic groups have similar needs and concerns. Statement 2: Persons with dementia and their caregivers who identify with the same cultural/ethnic groups have similar needs and concerns. Statement 3: Many minority ethnic older adults face several culturally associated and systemic barriers to timely diagnosis of dementia. Statement 4: There is a need to develop care practices tailored to the experiences, expectations, and needs of LGBT elders living with dementia.

**Assignment Rubric:**
For each Statement: 5 points x 4 = 20 points

---
| MO4: Assess how the culture of the formal care environment can impact the well-being of persons with dementia |
|---|---|---|---|
| **Statement** | **T/F Evidence** | **Citations Points** |
| True or False Correctly identified | A minimum of 3 specific facts/concepts from the module readings are provided to support your argument. | All evidence is clearly cited in correct APA format. All information is paraphrased i.e. no direct quotes are used. 5 points |

Final Paper and Presentation Requirements

For your final project/paper please choose **ONE** of the following assignments and review the requirements and rubric:

1. Book Analysis: Still Alice
2. Case Studies
3. Literature Review Paper
4. A Day in the Life

Final Presentation
For your final project/paper presentation please see the following requirements:

Guidelines
Your presentation will not be a summary of your project/paper but a presentation of one or two aspects of the assignment that are relevant to our coursework. You will make connections to our coursework in your presentations.

Format
For our final project/paper presentations we will base our presentations on the Pecha Kucha model. This model follows a format of a designated number of slides that are image and not word based, and a fast paced presentation style. For our purposes we will use 10 slides with 20 seconds of narration for each slide for a minimum/maximum of 3 minutes and 20 sec.

• If this is your first Pecha Kucha, consider viewing these examples. Our presentations are 10 slides 20 seconds each (3 mins 20 sec max.)
  http://www.pechakucha.org/watch
  Creating a Pecha Kucha Presentation Using PowerPoint
  #ACPA14 Pecha Kucha: Joe Gines, "20 Seconds of Courage" (Links to an external site.)
  • Please prepare your presentation in power point and set the slideshow to automatically transition to the next slide every 20 seconds.
    Please see the guide in the attached link. https://support.office.com/en-us/article/set-the-timing-and-speed-of-a-transition-c3c3c66f-4cca-4821-b8b9-7de0f3f6ead1
  • Record a slide show with narration and timings https://support.office.com/en-us/article/record-a-slide-show-with-narration-and-slide-timings-0b9502c6-5f6c-40ae-b1e7-e47d8741161c (Links to an external site.)
  • How To Guide Narrating Your Final Presentation.docx.pdf

Case Studies

Description of Assignment: Please provide two case studies that illustrate the concepts we have discussed. Examples of case studies can be found below. Your case studies should tell a story about a person with dementia and their journey with the disease. Each case study should include information about the person with dementia (age, gender etc.) disease/symptom related factors, social information, practical challenges, and psychological factors that may impact the person with dementia and any others involved in the scenario.

http://academic.csuohio.edu/Aging/
http://nursing.jbpub.com/gerontology/case_studies.cfm

Requirements
1. Write two one-page (single spaced) fictional case studies illustrating two concepts or areas of material discussed in class. Do not use a real life situation or real names but instead create a hypothetical situation that allows you to analyze a potentially real life situation.
2. In addition, for each case study include:
   - a series of five questions (with suggested answers - comprehensive and in narrative form) that will facilitate the learner/reader in demonstrating their understanding of the topic addressed. These responses should include references and connections to our coursework and all work should be cited correctly in APA format
   - an additional one -two page summary (double spaced) for each case study stating the aims, information you are trying to illustrate to the learner, concepts from our coursework that you are illustrating, and rationale for the scenario

Mechanics and Format (4 points):
- APA format
- Paper flows and is easily read because of smooth transitions between paragraphs. Sequence of topics is in a logical order.
- Appropriate paragraph length.
- Minimal formatting, grammar, and spelling errors.
**Grading of Assignment:** The following rubric will be used to assess your literature review. To calculate your grade, take your total points earned and divide by 32 (the total points possible) *100, resulting in a percentage out of 100% and then divide by 2 = total out of 50 points.

Book Analysis: Still Alice

Description of Assignment:
Please provide a (12-point font, double spaced, APA format) review/analysis of the fictional book ‘Still Alice’ by Lisa Genova

Requirements
1. Introduction to the book: Title, Author, Scope of book (what did it cover?), Author’s background (4 points)
2. Brief summary of the book (4 points)
3. How was your understanding of the dementia and our coursework enhanced by this book? (4 points)
4. Describe two themes that you identified in reading this book that relate to our coursework this semester and discuss how they relate to our coursework. (16 points)
5. Critique of book...was it worth a read? Why or why not? Contains your thoughts, responses and reaction to the book and your reaction to themes, author’s aims and intent, the subject of the book, how well it is written. (4 points)

Mechanics and Format: (4 points)
- All direct quotes cited correctly — no more than 5 direct quotes included
- Paper flows and is easily read because of smooth transitions between paragraphs. Sequence of topics is in a logical order.
- Appropriate paragraph length.
- Minimal formatting, grammar, and spelling errors.

Grading of Assignment: The following rubric will be used to assess your literature review. To calculate your grade, take your total points earned and divide by 36 (the total points possible) *100, resulting in a percentage out of 100% and then divide by 2 = total out of 50 points.

**Literature Review Paper**

**Description of Assignment:** You will write a 10-12 page (12-point font, double spaced, APA format) review of the literature pertaining to dementia.

You may choose the subject of your review but it must pertain to dementia and it must also pertain to the perspective of persons diagnosed with and living with dementia. For example, the topic of caregiver stress would not be appropriate but the topic of the adaptation of the person diagnosed to role of care recipient or the family/spousal relationships and adaptation when a person is diagnosed with dementia would both be appropriate. That is, your focus will be that of the experience of the person with dementia.

I would advise you to discuss your proposed topic with me before you start to write your review.

All peer-reviewed articles used must be recent (within the last 8-10 years) with the exception of foundational, theoretical works. APA format must be used throughout. APA resources are provided in our Getting Started Resources and an overview from our library can be accessed at: [http://guides.library.uncc.edu/c.php?g=173214&p=1142756](http://guides.library.uncc.edu/c.php?g=173214&p=1142756)

**Grading of Assignment:** The following rubric will be used to assess your literature review. To calculate your grade, take your total points earned and divide by 36 (the total points possible) *100, resulting in a percentage.

<table>

<tr>
<td><strong>Literature Reviewed</strong></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Information is gathered from multiple, current, research-based sources.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Information is gathered from multiple sources. 10-12 articles, some</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Information is gathered from a limited number of sources.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Information is gathered from a single source. Less than 10 articles,</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Introduction</strong></td>
<td>The topic is introduced, and groundwork is laid as to the direction of the article.</td>
<td>Readers are aware of the overall problem, challenge, or topic of the article</td>
<td>Readers are unclear as to the overall problem, challenge, or topic of the article</td>
<td>Neither implicit nor explicit reference is made to the topic or purpose of the article.</td>
<td></td>
</tr>
<tr>
<td>------------------</td>
<td>---------------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------</td>
<td></td>
</tr>
<tr>
<td><strong>Theme</strong></td>
<td>Well organized, demonstrates logical sequencing and structure.</td>
<td>Well organized, but demonstrates illogical sequencing or structure.</td>
<td>Weakly organized with no logical sequencing or structure.</td>
<td>No organization, sequencing, or structure.</td>
<td></td>
</tr>
<tr>
<td><strong>Body: Flow of the review</strong></td>
<td>The summary goes from general ideas to specific conclusions. Transitions tie sections together, as well as adjacent paragraphs. Sources are well-integrated and not simply described in succession.</td>
<td>The summary goes from general ideas to specific conclusions. Transitions tie sections together, as well as adjacent paragraphs. Sources are fairly-integrated and not simply described in succession.</td>
<td>There is a basic flow from one section to the next, but not all sections or paragraphs follow in a natural or logical order. Sources are not integrated and simply described in succession.</td>
<td>The summary appears to have no direction, with subtopics appearing disjointed. Sources are not integrated and simply described in succession.</td>
<td></td>
</tr>
<tr>
<td><strong>Conclusions</strong></td>
<td>Detailed conclusions are reached from the evidence offered. The author was able to make succinct and precise conclusions based on the review. Insights into the problem are appropriate.</td>
<td>Conclusions are reached from the evidence offered.</td>
<td>There is some indication of conclusions from the evidence offered. The author provides concluding remarks that show an analysis and synthesis of ideas occurred.</td>
<td>There is no indication the author tried to synthesize the information or make a conclusion based on the literature under review. No conclusions are made from the evidence offered.</td>
<td></td>
