Rationale (see instructions):

The proposed change to the Management of Aging Services, Minor requirements is a request to change the elective (12 credit) requirements from four 3-credit electives with two at the 300 level and two at the 400 level to a requirement for the same amount of elective credits (12 credit) with a requirement that all four 3-credit electives be either 300 or 400 level courses.

As all available electives for this program are 300/400 AGNG courses this will provide students with more flexibility and course choices while still completing their electives as upper level courses within our program.

With these requested changes no courses will be discounted and therefore no accommodations will need to be made to accommodate current students and no changes have been made in the number of required credits.
