Rationale (see instructions):

- What are the major departures from the current structure and why is the new structure preferable?
The major departure is clarity in sequencing of core course and common prerequisite preparation for all majors moving to the third core course, PSYC311. This is preferable as all students will enter the next course with the same level of content challenge and confusion in registration will be eliminated.
- What provisions will be made to accommodate current students if courses are discontinued?
Students who are failing PSYC211 in spring 2019 will be required to do their second attempt in PSYC309 with a special request to the registrar to accept PSYC309 in lieu of repeating 211(noting the second attempt). Once they pass PSYC309 a special request to the registrar will be made to remove the unsuccessful attempt in PSYC211 and replace with success in PSYC309.

Students who have successfully passed PSYC211 prior to summer 2020 will be grandfathered into the old sequencing process and move to the next core course.

- If there is a change in required credits, please provide a specific justification for that change.
There is no change in required credits.
