Subject: IS courses for CS + X
To: Anupam Joshi <joshi@umbc.edu>, Sreedevi Sampath <sampath@umbc.edu>

Anupam,

We are pleased to participate in the CS+X minor. The IS department will make the following courses available for the minor:

Courses:
IS202: Systems Analysis Methods
IS295: Introduction to Applications Programming
IS296: Foundations of Data Science
IS430: Information Systems Security
IS460: Health Informatics I
IS461: Health Informatics II
IS470: Software Testing
MGMT210: The Practice of Management
MGMT410: Operations and Supply Chain Management
MGMT310: Human Resources Management

Please note that the prerequisites, if needed for any of the courses, will remain in effect. In other words if a student wants to take a course with a prerequisite then they would need to complete the prerequisite.

Also note that resourcing would need to be addressed with the appropriate members of the university if and as these courses get high enrollments for the minor.

Thanks and we are happy to be part of this minor.
Vandana
