John,

I have spoken with members of the UGC. As I understand it, our 600 level courses would have to be approved as undergraduate courses for them to be part of a minor. Second, the UGC will want to see progress through a minor, and is unlikely to see graduate courses as the first exposure to be appropriate in progressing. third, they will want to know who is taking responsibility for advising. I imagine that will be in CS, but there should be some plan for coordinating.

Within that, I approve of the courses as part of the CS minor. Enrollment would depend on consent of instructor.

Best,

Susan

Susan,

Thanks for suggesting PUBL 600 and 604 for possible inclusion in the Computing Minor.

Anupam Joshi is putting together a proposal for the UGC to get the minor approved and could use an email from you supporting this being part of the minor. If you have specific questions about the minor, please contact Anupam directly.

Thanks,

John
