Rationale (see instructions):

We would like to add BIOL 495 as an elective option for the Biological Sciences B.A.'s Elective 2 requirement. Traditionally, BIOL 495 was left off the elective options for the BIOL B.A., because it is the capstone course for Bioinformatics majors. Many BIOL major have an interest in bioinformatics, but do not wish to pursue the area as a major. This course helps to fulfill the need of BIOL students who wish to learn more about the field of bioinformatics.
